3 BSC GROUP

BSC Group gave a power point synopsis detailing an overview on the finalized bike route depicting designated areas where seating nodes, parking, and signage/kiosk will be located. Focusing on the route itself and determining whether it will be changed into a sharrow, conventional bike lane, widened or a no parking vs. one sided road. Certain concerned intersections were noted for raised and /or colored pavement (paint vs. epoxy), taking into consideration low/high maintenance, also placing bike warning signs and signals where needed, and revamping the area near the businesses on Sutton Ave. near Main St. (Might need DOT approval.) The estimated cost of this project is \$250,000 to \$300,000 long term improvements and any changes can affect the cost. Some changes and foreseeable public critiques were mentioned by the members. BSC will go over the details and long term plans with John Casey, Town Engineer. BSC will put the draft on their website and will then email the members an invite to observe it. The BSC Group stated they will run a survey so the public would have an opportunity to express their concerns which will also help the commission see where the public stands on this project. A tentative date for January 20, 2016 was set for a public information meeting. Time and location will be determined.
