 Suniray Digital Imaging System

It has been determined that the Suniray Digital Imaging System will best meet the need of the Stratford Health Department- Mobile Program. This system needs to have the ability for children, teens, young adults and eventually adults/seniors. We have asked for pricing on all 3 sensors but anticipate an initial purchase of 2 sensors (#1 and #2). The x-ray unit currently used at the clinic is a Progeny Preva DC X-ray. Evaluating criteria will include cost of equipment, additional fees, ability to service the product, service fees, setup and training, cost of training and expected delivery date.

The mobile clinic will practice in several school locations using a laptop for the digital system. Internet connectivity may not be available at these sites. The intention is to bring the laptop to the Health Dept and connect to Primadent, our office program, after the clinic and download patient x-rays.
