**\*\*MEDIA ADVISORY\*\***

**Route 110 Realignment and West Broad Street Projects Update**

STRATFORD – Construction on the **Route 110 Realignment Project** is underway.

This project realigns the Sikorsky South entrance with Oronoque Lane eliminating a set of signal lights and improving traffic flow to ease the congestion currently experienced on Route 110 and Oronoque Lane.

In order to make the improvements, the roadway will be widened on both sides. Work is currently progressing on the widening of the west side of the road and the Oronoque Lane intersection. At the same time, overhead utility wire relocation will be taking place on the west side of the road.

Traffic will be constrained through the corridor during this time. The traveling public is advised to avoid the area during peak times if possible by using alternate routes. Traffic traveling east on Oronoque Lane will also be constrained and therefore using an alternate travel route from the west to Rte 110 is recommended.

This advisory is in effect through the end of this year but will be updated as construction progresses.

Construction on the **West Broad St Project** is underway.

This project will create turning lanes and traffic signals to improve traffic flow to ease the congestion and increase safety as well add drainage, sidewalks and aesthetic improvements.

TOWN OF STRATFORD  
**MAYOR LAURA HOYDICK**

Work is currently progressing on the curbing, sidewalks and drainage on Linden Ave from Church St to the I-95 off ramp.

Traffic will be constrained through the corridor during this time and Linden Ave is oneway eastbound where the work is currently active.

The traveling public is advised to avoid the area during peak times if possible by using alternate routes.

The public is reminded that local businesses are open and access to all business is being maintained.

This advisory is in effect through the summer of 2020 but will be updated as construction progresses.
